

E-SIA LEARNING

Prepared for the FIT Vietnam trade mission

Hanoi · Ho Chi Minh City · October 2026

Skills you can prove.

A Belgian learning technology company.

We help your people learn skills that show up on the job — and prove it. Our platform is EU-hosted, our methods are audit-ready, and every programme is built with you, for Vietnam.

Off-the-shelf. · Co-designed. · Or white-labelled.

Consulting defines the capabilities. Learning technology scales delivery, assessment and reporting.

Learning & Development Consulting

We help define capabilities, curricula and assessment models required for successful implementation.

- Needs analysis and role profiling
- Competency frameworks and curricula
- Assessments, rubrics and Train-the-Trainer
- Local adaptation with universities and sector experts

AI-Powered Learning Solutions

We support scalable delivery, assessment, certification and reporting across countries and sectors.

- Skills Accelerator — role, skills, assessment, readiness
- AI Buddy — trusted multilingual guidance at the moment of need
- Blended LMS, mobile and low-bandwidth delivery
- Certificates, dashboards, SCORM/xAPI, audit-ready reporting

Consulting brings contextual relevance. Learning technology makes delivery, assessment and reporting scalable.

Proven across countries, regions and sectors.

46

sustainability modules incl. train-the-trainer for UNIDO's LKDF (2024)

3,000+

staff trained in safety at Ineos / Praxis; 99–100% VCA pass rate

1,000+

employees on bilingual GMP e-learning at Ajinomoto Omnicem

24

Climate, ESG & green economy

Off-the-shelf, co-designed, or white-labelled. Your choice.

Start from ready-to-run tracks in weeks. Co-design with your team from scoping to Train-the-Trainer. Or white-label our platform under your own brand. Whichever fits — ownership stays with you.

Government & public agencies

- Co-design of national skills-development programmes
- Baseline studies, competency frameworks and evidence
- Audit-ready reporting for donor and policy priorities

Universities & TVET partners

- Co-developed competency-based curricula and assessments
- Train-the-Trainer and blended-delivery capacity building
- Local academic validation and Vietnamese localisation

Industry & employers

- Role-based tracks for technicians, operators and field staff
- AI Buddy job support grounded in your SOPs and manuals
- Integration with existing LMS/HRIS via SCORM/xAPI

Implementation & delivery partners

- Joint delivery with sector associations and implementers
- White-label option on the T2blend platform (EU-hosted)
- Localisation, translation and in-country trainer network

Co-creation model: joint scoping, co-designed content, local Train-the-Trainer and shared IP arrangements — so capacity stays in Vietnam.

E-SIA LEARNING

A Belgian learning technology company.

Prepared for the FIT Vietnam trade mission · October 2026

Thank you.

We'd love to continue the conversation — and build something with Vietnamese partners that lasts beyond this mission.
